### RE: GAME PAYOUT CERTIFICATION

This Certification Letter pertains to Technical Systems Testing (TST)'s Game Payout Calculations for the production game play log files gathered from the Ruby Royal (<http://www.rubyroyal.com>) Internet Gaming System (IGS) for the period 01 August 2009 to 29 October 2009.

TST's Game Payout Calculations resulted in summary payout percentages for the following game categories:

Game Type	Calculated Payout Percentage
Slot Machine Games	94.5598%
Table Games	95.9644%
Video Poker Games	95.7778%
Fixed Odds Games	96.7383%
<b>Overall (All Games)</b>	<b>95.0684%</b>

These values do not reflect the payout percentage of any individual game. Instead, they represent the payout percentage over all games within the category. These values are based on historical records and do not necessarily represent expected future payouts. The Calculated Payout Percentage is computed by summing all monies won for each game and dividing by the total money bet on the same games.

TST's Game Payout Calculations were limited to the game play log files submitted by Ruby Royal, and reviewed by TST in the laboratory environment. For verification purposes, TST has maintained a control version of these files. The scope of work for TST's Game Payout Calculations did not include a technical assessment of the Ruby Royal IGS or the associated Information Systems and financial controls.

TST certifies that the payout percentages listed above have been correctly calculated for the information supplied by Ruby Royal Casino, for the amounts wagered and won in the period 01 August 2009 to 29 October 2009.

Assuring you of our best attention at all times.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Noah Turner'.

Mr. Noah Turner  
Chief Technical Officer (CTO)
